Rock Rapids, IA 51246

Comcast's blatant and deceptive blocking of peer-to-peer communications is exactly the problem millions of Americans have warned would occur without Net Neutrality protections. The FCC must take serious and immediate action to put an abrupt end to this harmful practice and prevent other Internet service providers from following Comcast's example of discriminating against the free flow of online information. The Internet is a vital engine for economic growth, civic participation and free speech. We simply can't allow corporate gatekeepers to smother these democratic communications by discriminating against new technologies, secretly interfering with Internet traffic and stifling innovation.

We keep talking about our need to innovate in the new economy, to keep our economy from stagnating. How are we to do that when corporate interests squelch use of new technologies? Comcast's blatant and deceptive blocking of peer-to-peer communications is exactly the problem millions of Americans have warned would occur without Net Neutrality protections. The FCC must take serious and immediate action to put an abrupt end to this harmful practice and prevent other Internet service providers from following Comcast's example of discriminating against the free flow of online information. The Internet is a vital engine for economic growth, civic participation and free speech. We simply can't allow corporate gatekeepers to smother these democratic communications by discriminating against new technologies, secretly interfering with Internet traffic and stifling innovation.

The FCC must take serious and immediate action to put an abrupt end to this harmful practice and prevent other Internet service providers from following Comcast's example of discriminating against the free flow of online information. The Internet is a vital engine for economic growth, civic participation and free speech. We simply can't allow corporate gatekeepers to smother these democratic communications by discriminating against new technologies, secretly interfering with Internet traffic and stifling innovation.

Derek Forde

Shawn Gealow
3500 Grand Avenue
Ames, IA 50010

Comcast's blatant and deceptive blocking of peer-to-peer communications is exactly the problem millions of Americans have warned would occur without Net Neutrality protections. Furthermore, their decision to block the public from any FCC hearings, through paid seat-holders, with regards to net neutrality is despicable and underhanded. If they are supposed to be innocent of wrongdoing, why keep the public barred from the hearings? It is ridiculous. The FCC must take serious and immediate action to put an abrupt end to this harmful practice and prevent other Internet service providers from following Comcast's example of discriminating against the free flow of online information. The Internet is a vital engine for economic growth, civic participation and free speech. We simply can't allow corporate gatekeepers to smother these democratic communications by discriminating against new technologies, secretly interfering with Internet traffic and stifling innovation.

Iowa City, IA 52240

Comcast's blatant and deceptive blocking of peer-to-peer communications is exactly the problem millions of Americans have warned would occur without Net Neutrality protections. The FCC must take serious and immediate action to put an abrupt end to this harmful practice and prevent other Internet service providers from following Comcast's example of discriminating against the free flow of online information. The Internet is a vital engine for economic growth, civic participation and free speech. We simply can't allow corporate gatekeepers to smother these democratic communications by discriminating against new technologies, secretly interfering with Internet traffic and stifling innovation.

I am concerned about the actions of Comcast that involve monitoring and selectively blocking Internet traffic. This Administration's FCC is known to be quite corporation friendly and unfriendly to the free-speech rights of those who just don't happen to own a broadcast station or Internet Service. Perhaps the Bush appointed FCC members are smug about their history of their cozy relationships with corporations that wish to control the flow of information. But they are on the wrong side of history if that history has any promise of a bright future for Democracy. I hope that individuals will speak up against the excesses of corporate free speech, something the Founding Fathers would not approve.

Solon, IA 52333

Comcast is committing fraud by sending reset packets that appear to be from someone else. This might be acceptable for the http protocols as usually the downloads are small, but for the bit torrent protocol it's unacceptable. Not only that, but they advertise much higher speeds then they are capable of delivering to their customers. Broadband internet is advertised for the convenience of being able to download videos or watch IPTV. Comcast blocking the bit torrent protocol or "delaying" it at speeds well below their advertised speeds while allowing their affiliate sites to be unaffected is a clear abuse of their monopoly in places where the only high speed internet available is from Comcast.

Comcast's blatant and deceptive blocking of peer-to-peer communications is exactly the problem millions of Americans have warned would occur without Net Neutrality protections. The FCC must take serious and immediate action to put an abrupt end to this harmful practice and prevent other Internet service providers from following Comcast's example of discriminating against the free flow of online information. The Internet is a vital engine for economic growth, civic participation and free speech. We simply can't allow corporate gatekeepers to smother these democratic communications by discriminating against new technologies, secretly interfering with Internet traffic and stifling innovation.

Pat Palmer

Comcast's blatant and deceptive blocking of peer-to-peer communications is exactly the problem millions of Americans have warned would occur without Net Neutrality protections. The FCC must take serious and immediate action to put an abrupt end to this harmful practice and prevent other Internet service providers from following Comcast's example of discriminating against the free flow of online information. The Internet is a vital engine for economic growth, civic participation and free speech. We simply can't allow corporate gatekeepers to smother these democratic communications by discriminating against new technologies, secretly interfering with Internet traffic and stifling innovation.

I am contacting Senators Grassley and Harkin to voice my concerns as well. FCC is supposed to act in the PUBLIC interest not sucking up to corporate hogs. Comcast's blatant and deceptive blocking of peer-to-peer communications is exactly the problem millions of Americans have warned would occur without Net Neutrality protections. The FCC must take serious and immediate action to put an abrupt end to this harmful practice and prevent other Internet service providers from following Comcast's example of discriminating against the free flow of online information. Net neutrality is the most important thing for the internet, and for the world. Take away that, and you've taken away our freedom. I won't stand for that, nor will anyone else. Take it away, and there WILL be hell to pay. I promise you that.
